Application of Knowledge (3 credits minimum)

All students are expected to demonstrate the ability to apply knowledge in their chosen area of psychology through an internship and its accompanying seminar, or through past work or community involvement.

Internships are expected for students entering psychology as a new field of study, and for students exploring a new area of psychology. Examples of possible internship settings include research laboratories, child care agencies, group homes, mental health agencies, and community centers working with children, teens and families, or the elderly. This requirement can also be met through departmental teaching assistantships or through research assistantships associated with the psychology laboratory. Students with experience in psychology-related areas may elect to apply for credit through the assessment of prior learning or theory seminars, or incorporate this learning into a student-designed independent study.
